Advantage Communications & Paging introduces:

**HIPAA COMPLIANT PAGER MESSAGING**

Just when some thought pagers were antiquated technology easily replaced by cellular smart phones there comes a realization that cell phones really can’t do everything well and Pagers continue to evolve and perform.

Getting a secure message quickly and reliably in the basement of a building or the center of larger buildings like Hospitals, Medical Centers and Government buildings is one example. Getting a group of doctors or emergency responders notified of urgent messages fast (less than 20 seconds) is another. **Pager technology has evolved and provides benefits** of multiple input accesses of phone lines and internet portals to send messages. Page messages can be up to 750 characters, much longer than a phone text is able to match. **Pagers are now more secure than cellular smart phones.** Wireless phones are being hacked daily through use of Wi-Fi, Bluetooth, internet viruses’ and loss of phone. **Pagers can’t be hacked** because they have no means of access except through our paging carrier digital signaling. **NOW PAGING IS MORE SECURE** with Encryption enabled and locked messages requiring a pass code to read.

Advantage has upgraded our pager messaging system to provide Secure Wireless Messaging enabling HIPAA compliance for highly sensitive information. Utilizing NEW **Advantage Secure Pagers** and AES 128 bit key encrypted text messaging transmission to the Secure pager which is then locked in the pager until a secure code is entered to read the message.

**Advantage Secure Pagers** are considerably less expensive than a smart phone and paging service is also economical.

- **Current Advantage Paging users may trade in their existing pager for a special discounted price of $99.99 on a new secure pager and keep their same number.** (pager size and functions remain the same)

  * Secure Paging Service OPTION is only $5.00 per month additional to your existing rate.

  **This special introductory Secure Pager trade in price is good for a limited time.**
SWITCHING TO ADVANTAGE HIPAA COMPLIANT SECURE PAGERS IS EASY!

- Contact us to switch your existing pagers to our Secure Pagers and set a date to switch, your existing pager number remains the same,
- Notify your present answering service or medical centers using dial up modem access to use our special secure modem number (316-264-5151), all others using SNPP or email paging connection remain the same.
- Get the Advantage Secure Pager(s), Learn the unlock code and you are now secure!
- Trade in your existing Advantage Pager and agree to the optional billing and pager cost.
